

A TECHNICAL SEMINAR PRESENTATION REPORT

On

MOBILE APPLICATIONS SECURITY & ANDROID VULNERABILITIES

Submitted to

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY, HYDERABAD

In partial fulfillment of the requirement for the award of the degree of

BACHELOR OF TECHNOLOGY

in

COMPUTER SCIENCE AND ENGINEERING

(CYBER SECURITY)

By

DASARI SANUTHA

237Y5A6205

Under the Guidance of

Mr .Gunna Manoj , Assistant Professor

MARRI LAXMAN REDDY
INSTITUTE OF TECHNOLOGY & MANAGEMENT

(AN AUTONOMOUS INSTITUTION)

(Approved by AICTE, New Delhi & Affiliated to JNTUH, Hyderabad)

NAAC Accredited Institution with 'A' Grade & Recognized Under Section 2(f) & 12(B) of the UGC act, 1956

DEPARTMENT OF CSE - CYBER SECURITY

FEBRUARY, 2026

MARRI LAXMAN REDDY

INSTITUTE OF TECHNOLOGY & MANAGEMENT

(AN AUTONOMOUS INSTITUTION)

(Approved by AICTE, New Delhi & Affiliated to JNTUH, Hyderabad)

NAAC Accredited Institution with 'A' Grade & Recognized Under Section 2(f) & 12(B) of the UGC act, 1956

DEPARTMENT OF CSE - CYBER SECURITY

Date: 21-FEBRUARY-2026

CERTIFICATE

This is to certify that the technical seminar presentation report entitled “**MOBILE APPLICATION SECURITY & ANDROID VULNERABILITIES**” work done by **DASARI SANUTHA [237Y5A6205]** student of Department of Computer Science and Engineering, is a record of bonafide work carried out by the member during a period from January, 2026 to , FEBRUARY 2026 under the supervision of Mr. Gunna Manoj, Assistant Professor. This project is done as a fulfilment of obtaining Bachelor of Technology Degree to be awarded by Jawaharlal Nehru Technological University Hyderabad, Hyderabad.

The matter embodied in this technical seminar presentation report has not been submitted by me to any other university for the award of any other degree.

DASARI SANUTHA
[237Y5A6205]

This is to certify that the above statement made by the candidates is correct to the best of my knowledge.

Date: 21-02-2026

(Mr. Gunna Manoj)

The technical seminar presentation by the above student was held on

Head of the Department

External Examiner

Principal/Director

MARRI LAXMAN REDDY

INSTITUTE OF TECHNOLOGY AND MANAGEMENT

(AN AUTONOMOUS INSTITUTION)

(Approved by AICTE, New Delhi & Affiliated to JNTUH, Hyderabad)

Accredited by NBA and NAAC with 'A' Grade & Recognized Under Section 2(f) & 12(B) of the UGC act, 1956

DECLARATION

I hereby declare that the technical seminar presentation report entitled “**MOBILE APPLICATION SECURITY & ANDRIOD VULNERABILITIES**” is bonafide work duly completed by me. It does not contain any part of the report or thesis submitted by any other candidate to this or any other institute of the university.

All such materials that have been obtained from other sources have been duly acknowledged.

DASARI SANUTHA

[237Y5A6205]

ACKNOWLEDGEMENTS

I would like to express my sincere gratitude to my guide, **Mr. G. Manoj , Assistant Professor, Cyber Security**, for his excellent guidance and invaluable support, which helped me accomplish the B.Tech (CSE) degree and prepared me to achieve more life goals in the future. His total support of my dissertation and countless contributions to my technical and professional development made for a truly enjoyable and fruitful experience. Special thanks are dedicated for the discussions we had on almost every working day during my technical seminar presentation period and for reviewing my dissertation.

I am very much grateful to my Technical Seminar Presentation Coordinator, **Dr.B.Rebecca, Associate Professor, CSE - Cyber Security**, MLRITM, Dundigal, Hyderabad, who has not only shown utmost patience, but was fertile in suggestions, vigilant in directions of error and has been infinitely helpful.

I am extremely grateful to **HOD, Dr. M . Venkata Reddy & Associate Professor**, MLRITM, Dundigal, Hyderabad, for the moral support and encouragement given in completing my technical seminar presentation report.

I wish to express deepest gratitude and thanks to **Dr. R. Murali Prasad, Principal, and Dr. P. Sridhar, Director** for their constant support and encouragement in providing all the facilities in the college to do the technical seminar presentation report.

I would also like to thank all our faculties, administrative staff and management of MLRITM, who helped me to completing technical seminar presentation report.

On a more personal note, I thank my **beloved parents and friends** for their moral support during the course of our technical seminar presentation report.

ABSTRACT

Mobile applications have become an essential part of everyday life, providing services such as banking, communication, healthcare, and social networking. With the rapid growth of smartphones, especially Android devices, the need for strong mobile application security has become increasingly important. Android's open architecture and widespread usage make it a major target for cyber-attacks and malicious activities.

This project focuses on analyzing the security challenges associated with mobile applications and identifying common vulnerabilities present in Android applications. Vulnerabilities such as insecure data storage, weak authentication, improper permission usage, and insecure communication can expose sensitive user information and allow attackers to exploit applications.

The study also discusses different techniques used to detect and analyze these vulnerabilities, including static analysis, dynamic analysis, and security testing tools. By understanding these vulnerabilities and their impacts, the project highlights effective security practices and countermeasures that developers can implement to build secure Android applications and protect user data.

Overall, the project aims to increase awareness about Android application security and emphasize the importance of secure coding practices, vulnerability assessment, and continuous monitoring to ensure safer mobile environments.
